

Subscription Advantage Packs Now Available for Autodesk 2011 Software Releases

Press Release Issued by Autodesk

SAN RAFAEL, Calif., September 30, 2010 --(BUSINESS WIRE)--Autodesk, Inc. (NASDAQ:ADSK), a world leader in 3D design, engineering and entertainment software, announced the availability of Subscription Advantage Packs for Autodesk 2011 software releases. Subscription Advantage Packs provide exclusive and early access to product enhancements to Autodesk Subscription customers at no additional cost.

“Subscription Advantage Packs provide Autodesk Subscription customers with tools that help them to work more efficiently”

Available for select products, Subscription Advantage Packs include new product features, integrated web services and design content. These enhancements expand software capabilities, make it easier to practice sustainable design and help streamline the design process.

“Subscription Advantage Packs provide Autodesk Subscription customers with tools that help them to work more efficiently,” said Callan Carpenter, vice president, Global Subscription and Support, Autodesk. “Customers who use these new features and functionality can save time, make better design decisions and ultimately focus on the most important aspects of their projects.”

Key features of the 2011 Subscription Advantage Packs include:

-Conceptual Energy Analysis (CEA)*, available for Autodesk Revit Architecture and Autodesk Revit MEP 2011, is an application enabling users to automatically convert conceptual designs into analytical energy models using an integrated web service. Users can compare different designs to make more informed decisions during the conceptual design phase, when making changes is least expensive.

-The AutoCAD WS plug-in†, available for AutoCAD 2011 and all AutoCAD products, allows users to upload their DWG files directly to their AutoCAD WS online workspace for easier collaboration through web and mobile platforms. It also provides improved support for importing and exporting IGES files and a new DWG conversion tool.

-New functionality for Autodesk Inventor 2011 further accelerates the design process for manufacturers by extending the capabilities of Digital Prototyping with ease-of-use tools, better data interoperability, and new design tools.

-The Autodesk Maya 2011 Subscription Advantage Pack incorporates technology from renowned industry partners and Autodesk developers to provide higher-level access to animation, shading and effects feature sets, enabling artists to focus on creativity.

Subscription Advantage Packs are available exclusively for Autodesk Subscription customers. English versions are available now, and Autodesk plans to release additional languages later this Fall.

Autodesk Subscription Advantage Packs are available for the following Autodesk 2011 products:

Architecture, Engineering and Construction

- AutoCAD 2011
- AutoCAD Architecture 2011
- AutoCAD Civil 3D 2011
- AutoCAD Map 3D 2011
- AutoCAD MEP 2011
- Autodesk 3ds Max Design 2011
- Autodesk Navisworks 2011
- Autodesk Revit Architecture 2011
- Autodesk Revit MEP 2011
- Autodesk Revit Structure 2011

Subscription customers may download Subscription Advantage Packs from the Subscription Center at www.autodesk.com/subscriptionlogin. In-product access to Subscription Advantage Packs is also available for most products.

More information, including video demonstrations of the available Subscription Advantage Packs, may be viewed at www.autodesk.com/advantagepacks.

*The Conceptual Energy Analysis web service requires an active subscription to use.

† The AutoCAD WS plug-in for AutoCAD software is available to all AutoCAD customers and is not exclusive to AutoCAD Subscription customers.

About Autodesk

Autodesk, Inc., is a leader in 3D design, engineering and entertainment software. Customers across the manufacturing, architecture, building, construction, and media and entertainment industries – including the last 15 Academy Award™ winners for Best Visual Effects – use Autodesk software to design, visualize and simulate their ideas. Since its introduction of AutoCAD software in 1982, Autodesk continues to develop the broadest portfolio of state-of-the-art software for global markets.
